

# Canvas Parent Notifications

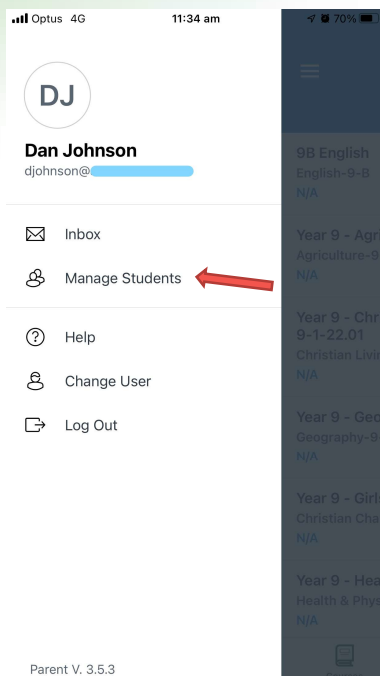

Notifications on Canvas are an integral part of our communication with you, but need to be customised so you only see the things that are important for you.

On the Canvas Parent App this can be done by clicking **Menu**, **Manage Students**, tapping on the child you want to adjust notifications for and adjusting when the app will send you an alert. I have added our recommendations in the last screenshot, but please set these up in a way that helps you best support each of your children.
